

Aggregation is MAGIC for three reasons:

1. The aggregation program is purchased in bulk (**25 towns!**)
2. The aggregation program has a 2 year contract compared to a 6 month contract for Eversource/National Grid

Reasons 1 + 2 = SAVINGS

3. The aggregation program includes GREEN energy options for both individuals (and towns).

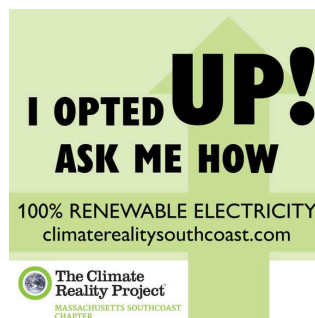

Starting in January 2024, it costs almost the same to be 100% renewable through the aggregation program as it does to be on Eversource Basic rate!

Option	Rate per kWh	Cost for 500 kWh of electricity
Basic Eversource (Jan. 2024)	\$0.17251	\$86.26
Basic National Grid	\$0.18213	\$91.07
Standard aggregation product	\$0.15784	\$78.92
100% Renewable (Plus)	\$0.17323	\$86.61
PREDATORY ENERGY	\$0.60	\$300 !!!!!

Check if you have the aggregation program by looking at your bill. It should say CONSTELLATION as the provider. If it says something other than Eversource or National Grid, contact that supplier. They are likely a predatory supplier and there may or may not be a fee to switch.

If you are NOT in the aggregation program or want to switch to 100% renewable, you can do so at <https://masscea.com>

As an individual, you can join at the basic rate or OPT UP to 100% renewable. The renewable energy comes from New England sources. This means it improves local air quality and adds local renewable jobs. The aggregation program helps build local renewable infrastructure.
